

# EXPOSURE CONTROL MEASURES

Primary prevention is key so that essential service workers, including drivers, mechanics and other staff, can continue to work and supply British Columbians with critical goods.

## Prevent infection and transmission

These common sense practices help prevent infection and transmission:

- Hand washing
- Sneeze or cough into your sleeve
- Avoid touching your face
- Practice social distancing (1-2 meters apart)
- Avoid public gatherings (especially those 50 people or larger)

## Specific measures we are taking:

- Restriction of foot traffic into building
- Walkup service window for customers
- Social distancing markers on walls and floor/ground
- Offering sanitation services for vehicles
- Hand sanitizer stations throughout premises
- Contactless vehicle pickup and dropoff
- All door handles and contact points sanitized multiple times a day
- Mandatory time off for employees exhibiting symptoms

Importantly, **if you feel sick, stay home**. It is important that we do not spread this highly contagious virus. We will make our best attempt to support you through whatever circumstances come our way.

If you exhibit symptoms of COVID-19 (e.g., fever, dry cough, etc.) use the BC COVID-19 Symptom Self-Assessment Tool (<https://covid19.thrive.health/>), and act on the directions of that tool, including the requirement to self isolate for up to 14 days pending test results and unless instructed otherwise by a health practitioner. If you cannot access the website or would prefer to talk to someone, please call 8-1-1.
